VMware Tools 的安装方法

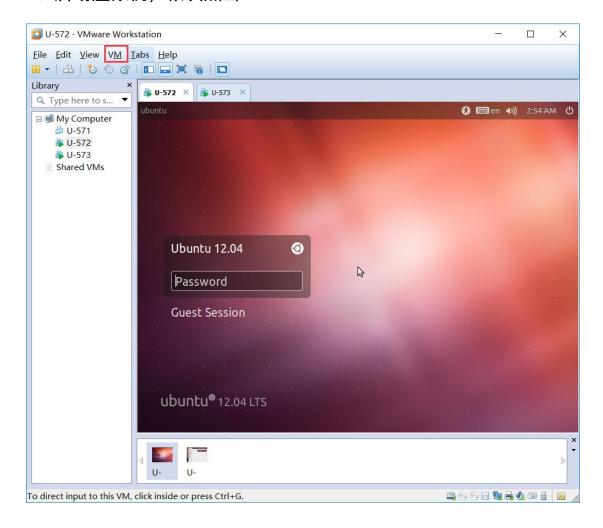

1、在虚拟机设置中更改 CD/DVD 与 Floppy 的 Connection 为 Use physical drive

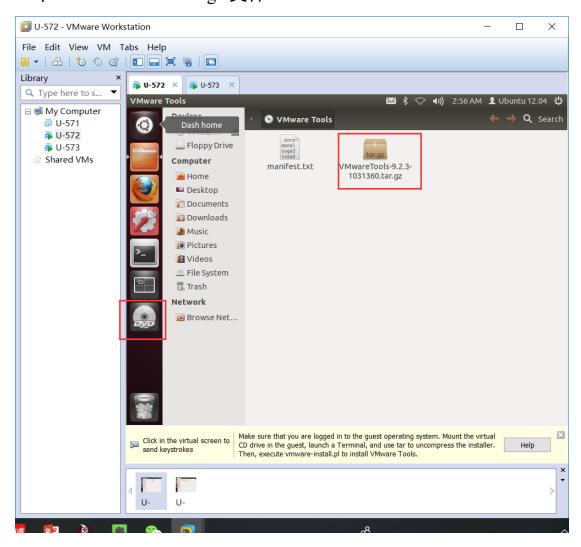

2、设置网络适配器中网络连接为 NAT 模式

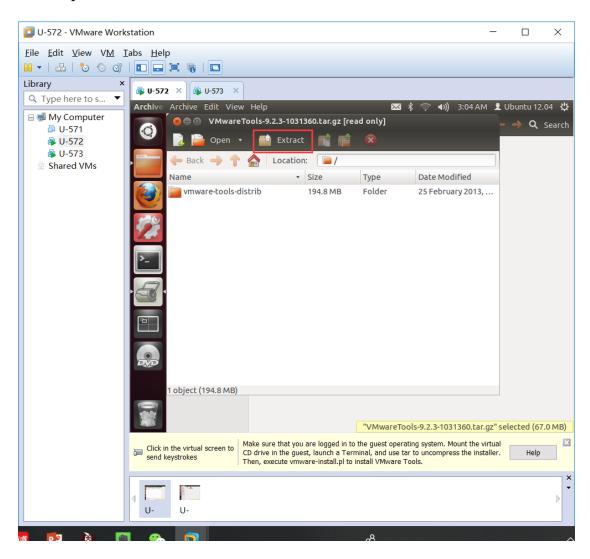

3、启动虚拟机,依次点击 VM——Install VMware tools

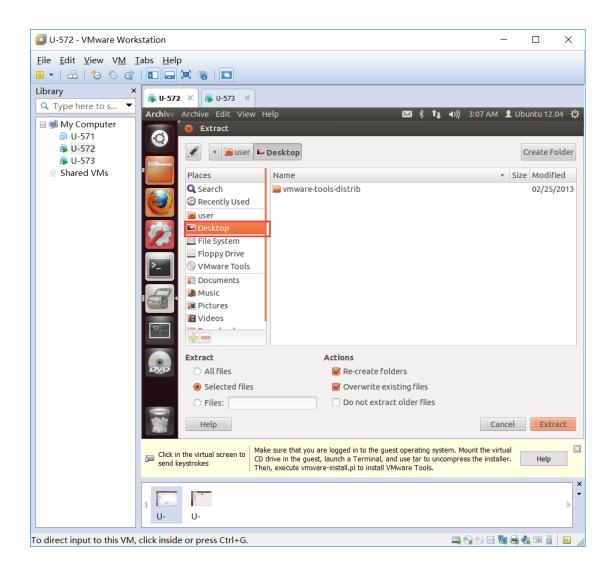

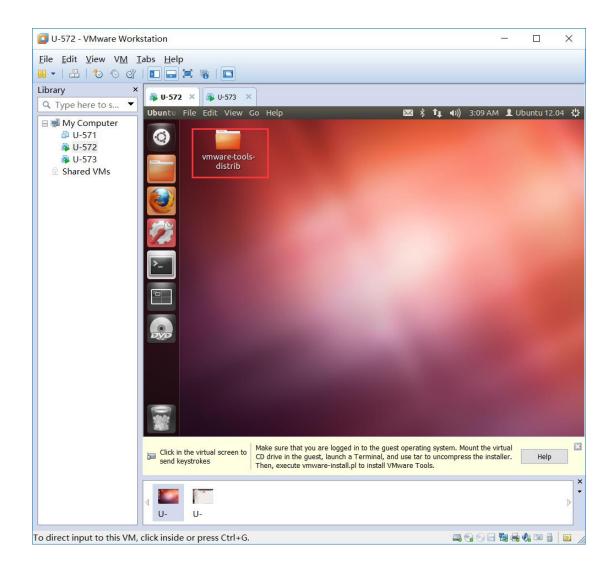

4、此时虚拟机设备下多了 VMware Tools 这一项,点击它,里面有一个 VMwareTools...tar.gz 文件:

5、接下来把 VMwareTools...tar.gz 文件提取到某个目录下,如 Desktop。在 Desktop 上看到一个 vmware-tools-distrib 文件夹

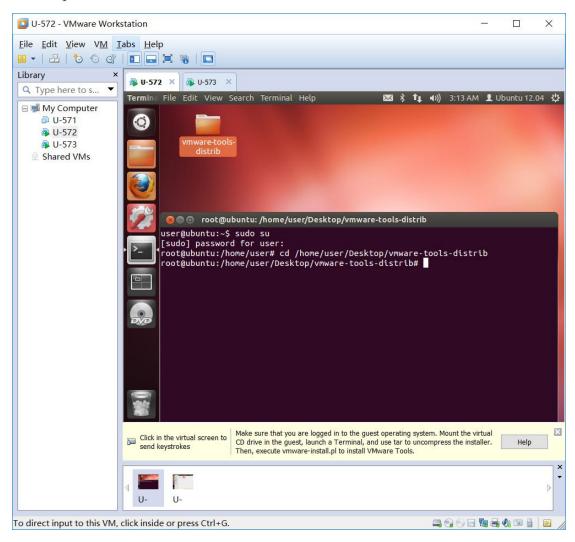

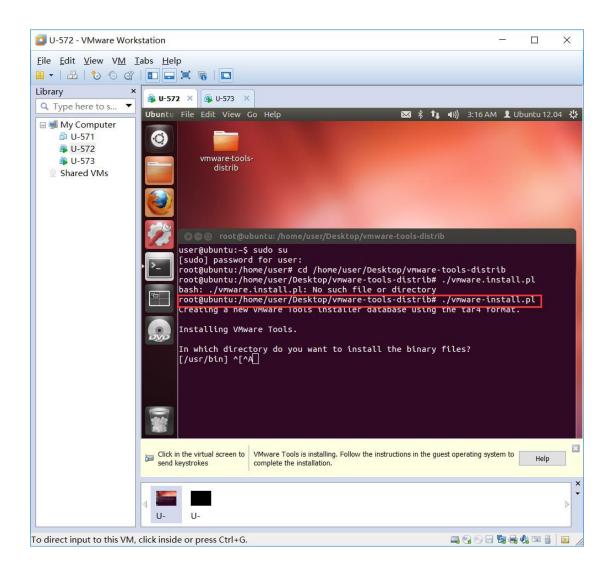

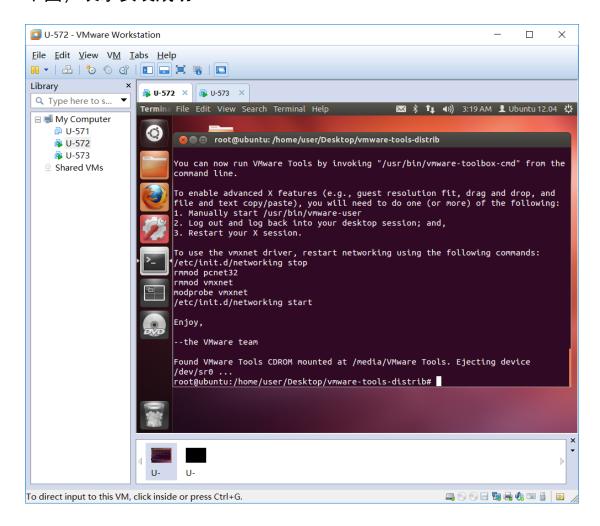

6、进入 vmware-tools-distrib 文件夹下,输入命令: ./vmware-

install.pl

7、根据提示输入 yes/no 命令(一般一直按 Enter 即可), 直到出现下图,表示安装成功

8、重启虚拟机,并将网络适配器重新设置为原来的 custom 模式即可。此时便可实现主机与虚拟机之间文件的共享
